

BAHIA DEL DUQUE  
THE TAIS

# Environmental Policy

**Bahía del Duque is committed to developing its activities in a way that respects the environment and minimizes the impact that this activity may have in its surroundings.**

**We have developed an Environmental Policy marking as commitment the achievement of the subsequent aspects:**

- To ensure the compliance of all the requirements established in the environmental laws applicable in the area of the activity development.
- To promote the rational and efficient use of natural resources, searching for ways to continue to improve in terms of saving measures, energy efficiency and reducing greenhouse gas emissions, as well as measures that allow for an improvement in water management efficiency
- To introduce measures aimed at reducing waste amount and facilitate its recycling through authorized companies/agents.
- To raise staff awareness about their responsibility with the environment by providing specific training for each job position.
- To inform our stakeholders of all the activities taking place in regards to the environment.
- To work, preferably, with suppliers committed to the environment, carrying out their evaluation considering environmental responsibility criteria.

With this declaration of principles and the ensuing fulfilment of the commitments set by the environmental management system, Bahía del Duque hopes to continue to improve in the treatment of negative environmental impacts generated by the Hotel's activity and boost the initiatives that place us as a tourism company that is respectful its environment, with the future, and with upcoming generations.
